## PERSONAL PROJECTS

### Farmer To Consumer(AgriVatika)

- Developed AgriVatika, a React.js-based platform enabling direct transactions between farmers and consumers. Built a full-stack solution using Node.js, Express.js, and MongoDB for user authentication, product listings, and secure payments. Designed an intuitive UI with real-time updates to streamline communication and transactions.

### Doctor Appointment System

- Built a Doctor Appointment System with React.js for seamless booking, rescheduling, and cancellations. Integrated secure authentication and real-time notifications using Node.js, Express.js, and MongoDB, achieving high user satisfaction.

### Blog Management System

- Developed a blog management platform using React.js, Node.js, Express.js, and MongoDB, enabling users to create, edit, and delete posts. Implemented role-based access, and a rich text editor with image upload functionality. Designed a responsive UI for a better user experience.

### Personal Portfolio Website

- Designed and developed a personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and certifications. Implemented a responsive layout and integrated GitHub and LinkedIn links for easy access to professional profiles.
